PART ONE

Introduction and Vision

— Building a Martian Ecosystem —

A Introduction

As humanity's interest in space exploration continues to grow, Mars has emerged as a potential target for human exploration. In this process, cryptocurrency serves as an innovative means of fundraising and exchange, not only providing new financing opportunities for space exploration but also fostering global community participation and support.

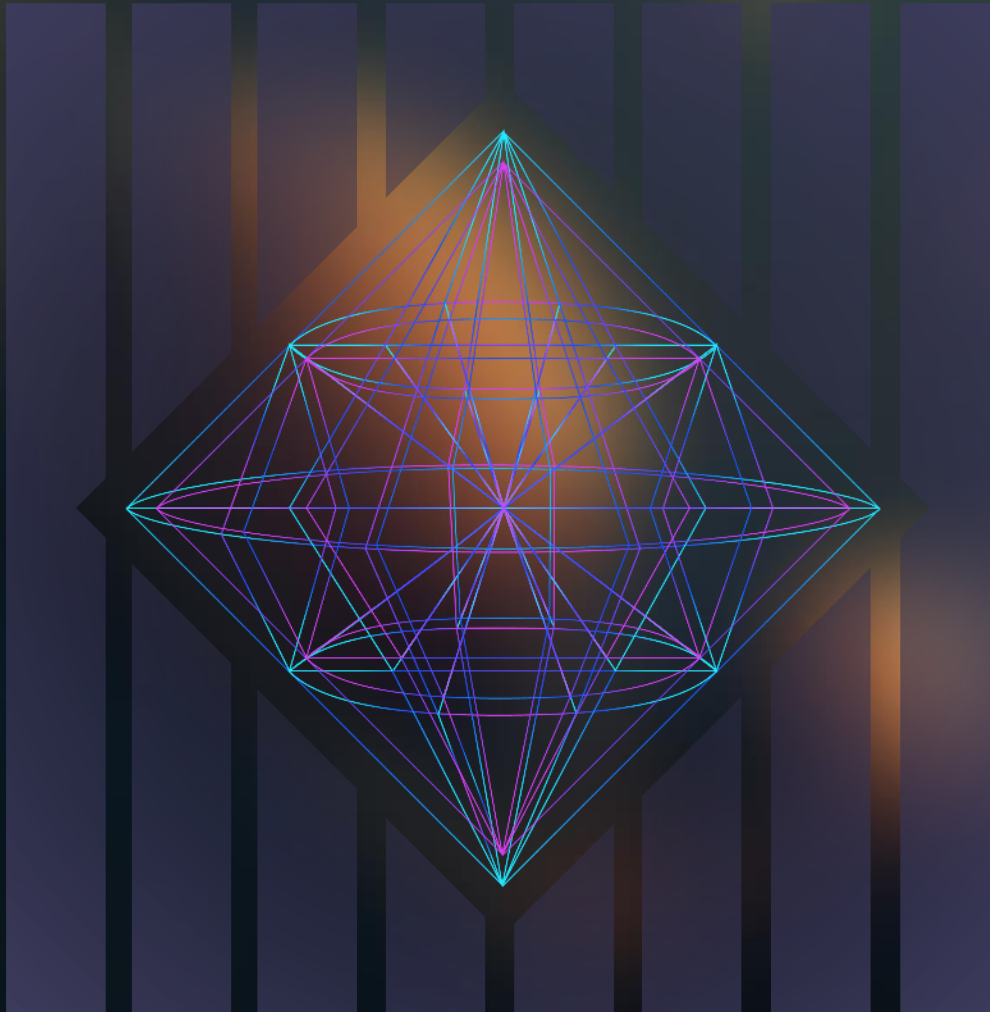

ToMarsCoin (TOMARS), as an emerging digital asset, aims to support and propel the future development and exploration missions of the Martian ecosystem.

A Mission and Vision

The mission of ToMarsCoin is to facilitate human exploration towards Mars through cryptocurrency technology. We believe that by establishing a secure, transparent, and efficient blockchain platform, sustainable financial support for Martian exploration can be provided, while motivating global community involvement in this historic mission.

ToMarsCoin envisions becoming the core currency unit of the future Martian ecosystem, supporting various projects and services including but not limited to resource extraction, infrastructure development, and scientific research. Through the introduction of advanced blockchain technology and smart contracts, ToMarsCoin is dedicated to establishing a secure and reliable trading network, offering interactive opportunities for investors.

PART TWO

Technical and economic
models

— Improve the economic model —

"Swipe to Earn" Model

At the forefront of our mission is the development of an innovative gaming experience that seamlessly merges GameFi dynamics with social interaction, all revolving around the TOMARS theme. Our vision is to harness the power of blockchain technology to establish TOMARS tokens as the primary currency within the future Mars ecosystem. This will empower diverse initiatives ranging from resource extraction and infrastructure development to cutting-edge scientific research.

In our initial phase, we are harnessing the foundational strengths of contemporary DeFi platforms to create an engaging game centered on a straightforward sliding mechanism. This approach ensures equitable mining opportunities for our vibrant community.

Economic model

01 Mining Robots

Automated Telegram bots for token mining and distribution.

03 DeFi Governance

TOMARS token holders possess voting privileges and can influence the platform's future development direction.

02 Airdrops

Each player stands a chance to receive TOMARS tokens and NFT airdrops courtesy of the ToMarsCoin community.

04 Other features

"Pool liquidity, margin trading, and more."

PART THREE

Development Roadmap and Token Economics

— Planning for a trip to Mars —

Roadmap

The journey to Mars is quite a trek, but oh-so thrilling! Imagine the breathtaking vistas and groundbreaking discoveries waiting to unfold as we push the boundaries of human exploration further than ever before.

01

Q2-Q3 2024

Launch ToMarsCoin Game

Launch and develop the Telegram TOMARS-themed casual gaming community.

Utilize the "slide to earn" model to attract our first wave of users.

02

Q4 2024

Airdrop, Exchange Listing, Staking

List project tokens on leading cryptocurrency exchanges, initiate token airdrops, and reward early users and community contributors. Enable token staking functions with an estimated annual return rate of 50%-100%, subject to the actual number of participants.

03

Q1 2025

Open NFT studio and airdrop

Introducing our official DIY Original Game Room NFT, accompanied by an exclusive airdrop for early users. This initiative offers a pioneering experience within our meticulously designed game space.

Roadmap

The road to Mars may be long, but the excitement along the way is boundless! Every milestone we achieve brings us closer to unlocking the mysteries of the Red Planet and reshaping the future of space exploration.

04

Q2 2025

TOMARS Mars Journey

The launch of the Space Experience Center offline allows the community to experience Mars using TOMARS tokens. This aims to increase participation, token adoption, and community bonding to promote project development.

05

Q3-Q4 2025

To the Mars

Help develop Mars research and achieve this great goal.

Token Economics

There will only ever be 10 billion TOMARS tokens in circulation, with mining output halved every quarter. Post-listing, community advertising fees and other commercial income will exclusively fund token repurchases and subsequent burning, ensuring a sustained increase in coin value.

5% LIQUIDITY

In Q4, ToMarsCoin will enhance liquidity by introducing staking options and offering accelerator shares for purchase. These actions are pivotal in our strategy to fortify ToMarsCoin's liquidity and establish a stronger foothold in the market.

37% STAKING

32% is allocated for staking rewards, incentivizing active participation and fostering a robust ecosystem of token holders committed to the long-term success of ToMarsCoin.

56% AIRDROP

To ensure price stability, ToMarsCoin will implement a phased token airdrop strategy, prioritizing distribution to the top 100,000 holders of ToMarsCoin game shares.

2% ECOSYSTEM

2% is allocated for ecosystem maintenance to ensure the smooth operation and ongoing development of the ToMarsCoin ecosystem.

A vibrant, colorful space scene featuring several planets and a ringed planet against a starry background. The planets are rendered in various colors like orange, purple, green, and red, with swirling patterns and textures. A ringed planet is visible in the center. The background is dark with scattered white stars. The word "Thanks" is written in a large, white, bold, italicized font across the center of the image.

Thanks
